Election/Restrictions

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-15, drawn to the method of manufacturing, classified in class 438, subclass 199.
- II. Claims 16-30, drawn to the device, classified in class 257, subclass 288+.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as the process of making and the product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process [MPEP §806.05 (f)]. For example, the method may involve As as the dopant in step (c) but the product-by-process may be doped with Sb. Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2824

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
